Prof. Michal Bijak, PhD, Dsc
Head of Biohazard Prevention Centre
Faculty of Biology and Environmental Protection
University of Lodz

Letter of Recommendation

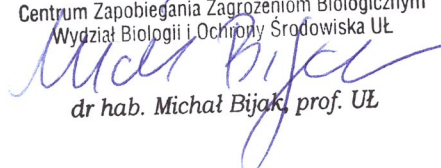

Dear Sirs/Madams,

As a Head of the Biological Hazard Prevention Center, Faculty of Biology and Environmental Protection at University of Lodz I would like to recommend **Novazym COVID-19 IgG/IgM Rapid Test Cassette** as an excellent tool to conduct screening diagnostics for the detection of anti Sars-Cov-2 antibodies in patients with suspected infestation. **Novazym Polska s.c.** as a company in terms of reputation, affordability, and support. The numerous glowing testimonies by companies and institutions currently benefiting from the product, and the abundance of positive references and reviews in our trade, lead me to view the product as well-tested, legitimate, and of high quality.

Our experience of working with the above-mentioned tests is very positive. The technical parameters of the tests coincide with the actual results obtained during detailed tests with more sensitive qPCR analytical method.

As a supplier, Novazym maintains the highest standards in service. We are satisfied with the quality and reliability of the diagnostic kits. Each delivery was carried out reliably. We are very grateful for the substantive support provided by the supplier. We look forward to longer cooperation. We look forward to further cooperation with Novazym and we are grateful for help in reducing the effects of the epidemic in the country. We are really grateful for valuable help and humanitarian assistance provided by **Novazym Polska** company. We look forward to further cooperation.

Best Regards,

KIEROWNIK
